SUMMARY

BTech CSE student at IIIT Delhi with hands-on experience developing real-time web dashboards during internship at NIC. Skilled in **Python, REST APIs, Flask, and backend systems**. Seeking **part-time and internship** opportunities in **web development, backend engineering, or cybersecurity applications**.

EDUCATION

Indraprastha Institute of Information Technology Delhi (IIIT Delhi)
Bachelor of Technology in Computer Science and Engineering

2023 – Present

EXPERIENCE

**Summer Intern — National Informatics Centre (NIC),
Ministry of Electronics & IT, Government of India**

May 2025 – July 2025

New Delhi, India

Guide: Mr. Vivek Rana

Project: *Security Devices Monitoring Dashboard* [GitHub Link](#)

- Developed a real-time security monitoring dashboard for Cyber & Information Security Division at NIC.
- Integrated REST APIs to fetch and process live device data, converting it into structured JSON for backend processing.
- Built a Flask-based web application to visualize live traffic, attack patterns, and session metrics.
- Designed dynamic frontend components to display real-time device status and analytics.

PROJECTS

Course Registration System | Java, OOP [GitHub Link](#)

- Developed a system for student course registration and tracking using structured backend logic.
- Designed modular architecture for managing students, courses, and faculty operations.

Food Ordering System | Java, OOP [GitHub Link](#)

- Built a menu-driven application to simulate real-world food ordering workflows.
- Implemented role-based functionality for users and admin operations.

Angry Birds Clone | Java, LibGDX, Box2D [GitHub Link](#)

- Developed a 2D Angry Birds-inspired game using Java, LibGDX, and Box2D physics engine.
- Implemented gameplay mechanics, animations, and collision handling.

SKILLS

- **Languages:** C++, Python, Java, SQL
 - **Web & Backend:** Flask, REST APIs
 - **Tools:** Git, Linux, GROMACS, VMD
 - **Core Concepts:** Data Structures & Algorithms, OS, DBMS, OOP
-
