EDUCATION

Indraprastha Institute of Information Technology Delhi (IIITD)

New Delhi, India

B.Tech in Computer Science Engineering

August 2023 – Present

WORK EXPERIENCE

National Informatics Centre (NIC)

New Delhi, India

Ministry of Electronics and Information Technology, Govt. of India

Software Engineer Intern, Cyber and Information Security Systems Division

May 2025 – July 2025

- Developed a **Real-Time Security Devices Monitoring Dashboard** to centralize the monitoring of network traffic, attacks, sessions, and security events from multiple security devices.
- Designed interactive visualizations and reporting modules to provide actionable insights for security operations, improving visibility into critical cybersecurity metrics and trends.
- Collaborated with cybersecurity professionals to analyze security logs and automate monitoring workflows, gaining hands-on exposure to security operations and government-scale IT infrastructure.

PROJECTS

Personal Portfolio Website

Tech Stack: React.js, Tailwind CSS, JavaScript, HTML, CSS, Vercel

Jun 2026

- Designed and developed a responsive portfolio website using **React.js** and **Tailwind CSS** to showcase projects, skills, internships, and leadership experience.
- Integrated resume download and external links to GitHub, LinkedIn, certificates, and project repositories; deployed the website on **Vercel**.

Functional Clone of Angry Birds Game

Tech Stack: Java, LibGDX, Box2D, OOP

Sep 2024 – Nov 2024

- Developed a clone of the **Angry Birds** game using **LibGDX** and **Box2D**, implementing realistic physics-based gameplay mechanics.
- Built features including projectile launching, collision detection, object destruction, level progression, and interactive UI screens.

Online Course Registration System

Tech Stack: Java, OOP, Data Structures, Database Concepts

Sep 2024 – Nov 2024

- Built a menu-driven course registration system enabling students to register for courses and manage academic records efficiently.
- Implemented student and administrator functionalities using **object-oriented programming** principles and modular system design.

Online Food Ordering System

Tech Stack: Java, OOP, Data Structures, UI Design

Sep 2024 – Nov 2024

- Developed a menu-driven food ordering system allowing students to browse menus, place orders, and track food availability.
- Implemented canteen management features including menu updates, order handling, and food availability management.

SKILLS

Programming Languages: Java, Python, C++, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems

Web Development: React.js, Tailwind CSS, HTML, CSS, JavaScript, GitHub, Vercel

Tools & Technologies: Git, GitHub, Vercel, Figma, LibGDX, Box2D
